Controlling infection

The health and well being of all the children here is of the utmost importance to us. It is for the protection of your child that we must insist on a strict adherence to Foundation First Health Policy. Please read and understand it fully. Do not wait until your child is sick to think about what is best for all concerned. Even with precautions, children do get sick. In some cases you will be required to submit a written report from your doctor before your child may return to Teachable Moments. This is to ensure that a child does not return to the Center when he or she may be in danger of exposing someone else to an illness. Some contagious illnesses are no longer contagious after the child has been on medication for 24 hours of medication.

We required that all children who are on medication do not attend childcare until the full 24 hours of medication has been given. There are a number of immunizations required by law before your child may attend childcare. Upon enrollment you will be asked to fill out a health appraisal. Please make sure that all immunizations are up to date.

If you are called to pick up your child because they are ill, 1 hour will be given to pick up the child. **If anyone has been exposed to COVID-19 or Delta variant, the Health Department will be notified. We will follow all recommendations given from the Health Department. This could result in the center closing temporarily and quarantine of individuals.** Your child will be separated from the other children to lower the incidence of spreading the illness. If there is an incidence of illness, all parents will be notified by posting and via email notification. These rules also apply to staff that exhibit these symptoms. The following illnesses by law exclude a child from attending child care:

- **Pink eye (Infectious Conjunctivitis)**
- **Diarrhea (must remain clear for 24 hours)**
- **Impetigo**
- **Chicken Pox**
- **Hepatitis A**
- **Scarlet Fever**
- **Cold symptoms (cough/runny nose)**
- **Vomiting (must remain clear for 24 hours)**
- **Fever over 100 degrees (must remain clear for 24 hours)**
- **Strep Throat**
- **Ringworm**
- **Lice**
- **Scabies**
